2. 1. Your Website at a Glance
3. 2. Your Accounts
4. 3. Using the Admin Panel
5. 4. Keeping Your Website Up to Date
6. 5. If Something Goes Wrong
7. 6. Our Ongoing Support
8. 7. Handover Checklist and Sign-off

Welcome to Your New Website

Dear Dr. Hamid,

Thank you for choosing Kelpsi Software LLC. Your clinic's new website is complete, and this pack hands it over to you. It explains, in plain language, what the website does, how your team uses it each day, and how we will keep supporting you.

Clinic	Pearl Aesthetics & GP Medical Clinic L.L.C, Dubai
Built by	Kelpsi Software LLC
Website address	[To be confirmed]
Handover date	[To be confirmed]

What you are receiving

- **Your website.** It introduces the clinic, your doctors and your treatments, and works on phones, tablets and computers.
- **Online booking.** Patients can request a consultation any time of day.
- **An online shop** for your skincare products, with secure card payments.
- **A private admin area** where your team manages bookings, orders, products and treatments.
- **Your Instagram and Google reviews**, shown on the website automatically.
- **Ongoing support** from our team.

What is in this pack

	Section	What it covers
1	Your website at a glance	What the website does for you and your patients
2	Your accounts	The services behind the website, and why the clinic should own them
3	Using the admin panel	A day-to-day guide for you and your team
4	Keeping your website up to date	What updates itself, and what to send us
5	If something goes wrong	Simple checks, and when to call us
6	Our ongoing support	The services we will continue to provide
7	Checklist and sign-off	What we go through together at handover

Your contacts at Kelpsi Software LLC

Role	Name	Email	Phone
Project lead	[Name]	[Email]	[Phone]
Support	[Name]	[Email]	[Phone]

1. Your Website at a Glance

What patients can do

- **Learn about the clinic:** your story, your doctors and every treatment you offer.
- **Book a consultation:** choose a treatment, a doctor, a date and a time.
- **Buy skincare products** and pay securely by card, Apple Pay or Google Pay, or order through WhatsApp.
- **Watch your videos and see real results** from the clinic's Instagram, without leaving the website.
- **Read your Google reviews** and find the clinic easily on Google Maps.
- **Contact the clinic** by phone, WhatsApp or the contact form.

What happens automatically

You and your team don't need to do anything for these:

When...	The website...
A patient books a consultation	Saves the request, sends the patient a confirmation email, and alerts the clinic by email and WhatsApp
A customer pays for a product	Records the payment, updates stock, emails the customer, and alerts the clinic
The clinic posts on Instagram	Shows the new post or video on the website shortly afterwards
A patient leaves a Google review	Shows your latest reviews and star rating

The main pages

Home · Treatments · Treatment Menu · Book a Consultation · Our Doctors · Results & Gallery · Shop · Special Offers · Insights · About · Contact

Your team also has a private **admin panel**, explained in section 3.

Still needed from the clinic

A few items need content from you before the website is fully complete:

- **HydraFacial before and after photos.** The page currently shows sample images. We need real photos from patients who have given written consent.

- **Insights articles and Special Offers.** These pages show sample text. Send us your real articles and current offers.
- **The clinic's email address.** Please confirm the correct inbox for website messages. The website currently shows info@pearlaestheticgp.com.

2. Your Accounts

Your website relies on a few trusted online services, much as a clinic relies on its landlord, bank and phone company. **Each account should be in the clinic's name**, so you always stay in control of your website. We are then added as helpers so we can support you.

The services behind your website

Service	What it does for you	Cost	In the clinic's name?
Netlify	Keeps the website online	Free to start	[ ]
Supabase	Stores bookings, orders, products and your team's logins	Free to start; about US$25 a month as the clinic grows	[ ]
Stripe	Takes card payments and pays them into the clinic's bank account	A small fee per payment	[ ]
Gmail	Sends the website's emails to patients and the clinic	Free	[ ]
Meta (WhatsApp and Instagram)	Sends WhatsApp alerts and shows your Instagram on the website	Free, or a few fils per WhatsApp alert	[ ]
Google	Shows your Google reviews	Usually free	[ ]
GitHub	Keeps a safe copy of the website itself	Free	[ ]
Domain name	Your website address	Yearly renewal	[ ]

We will tick the last column together at handover.

Keeping passwords safe

> We never write passwords in documents or send them by email or WhatsApp. We hand them over in person or through a secure password manager. Please do the same.

Your team's access

- **You are the main administrator** of the admin panel. You are the only person who needs an account set up by us.
- **You invite your team yourself**, by email, from the admin panel. Section 3 shows how.
- When someone leaves the clinic, remove them on the same day. Their access ends straight away.

Patient information

The website stores patients' names, contact details and booking details. Only your invited team can see them, after signing in. As with your clinic records, the clinic is responsible for using this information in line with UAE data-protection rules and DHA requirements.

3. Using the Admin Panel

The admin panel is the private part of your website, where you and your team manage the clinic's online activity. Open it by adding **/admin** to your website address, or click **Staff Login** at the bottom of any page.

Signing in

1. Enter your email and password.
2. Click **Sign In**.
3. When you finish, click **Sign Out**, especially on a shared computer.

Inviting your team (Dr. Hamid only)

Only you see the **Staff** page.

1. Open **Staff** in the menu.
2. Type the person's **name** and **email**, then click **Send invite**.
3. They receive an email called **"Your invitation to the clinic admin panel"**. They click the button in it and choose their own password. The link expires after 24 hours.

Each person on the Staff page shows as one of:

Status	Meaning
Invited	The email was sent; they haven't set their password yet
Active	They have set a password and can sign in

Other buttons on the Staff page:

- **Resend invite.** Sends a new link if theirs has expired.
- **Reset password.** For a team member who has forgotten their password. They receive a new link by email.
- **Remove.** Ends that person's access immediately. Use it on the day someone leaves the clinic.

> Everyone you invite can see bookings, orders, products and treatments. Only invite people who need it for their work.

Dashboard

The first screen shows a summary: new booking requests, unpaid orders, money received, and products running low. New bookings and orders appear on their own; there is no need to refresh the page.

Bookings

Every consultation request from the website appears here.

Status	Meaning	What to do
Pending	A new request	Call or WhatsApp the patient to confirm the time
Confirmed	The time is agreed	Add it to the clinic's appointment system
Completed	The patient attended	Nothing
Cancelled	It won't go ahead	Nothing

- The **WhatsApp** button opens a chat with the patient, with a message already written.
- Update the status as each booking moves along.

> A website booking is a **request**. Please contact the patient to confirm, ideally the same day.

Orders

Each order shows:

- **Payment.** This updates by itself: *Pending*, *Paid*, *Failed*, *Expired* or *Refunded*.
- **Delivery.** Your team updates this: *Pending*, *Processing*, *Shipped*, *Completed* or *Cancelled*.

Refunds are made in your **Stripe** account; the order then shows *Refunded* on its own. For orders placed by WhatsApp, contact the customer to arrange payment and delivery.

Products (Inventory)

- **Add Product:** enter the name, price, stock, description and a picture link.
- **Edit:** click the pencil icon.
- **Hide** a product without deleting it: switch **Active** off.
- Stock goes down by itself when a product is sold. Update it when new stock arrives.

Treatments

Changes here update the treatments shown across the website.

- **Featured** shows a treatment prominently on the home page.
- Switch **Active** off to hide a treatment without deleting it.

Good habits

- Check the dashboard at the start and end of each day.
- Every team member should have their own login. Never share passwords.
- If something looks wrong, note the patient's name and the time, and contact us.

4. Keeping Your Website Up to Date

Updates by itself: Instagram

Results, videos and photos of the clinic come from your Instagram account, **@pearl_medicals**. Post on Instagram as usual, and the post appears on the website shortly afterwards. Videos play on your website in its own player.

A few words in the caption decide where a post appears:

Add this to the caption	The post appears in
before & after or **#results**	Patient Results
#ourclinic or **#facilities**	The "Inside the Clinic" section on the home page
#event, **#healthtips** or **#team**	The matching section of the gallery

- The **first line of the caption** becomes the post's title on the website, so keep it short.
- If you delete a post on Instagram, it disappears from the website too.

> Only share before and after photos of patients who have given written consent.

Updates by itself: Google reviews

Your latest Google reviews and star rating appear on the home page. Encouraging happy patients to leave a review helps the clinic, and the website links straight to your review page.

Your team can change

Products, prices, stock and treatments, from the admin panel. See section 3.

Send these changes to us

Some content is built into the website, and we update it for you:

- Phone numbers, address, opening hours or email
- Doctors: new doctors, photos, biographies, languages and qualifications
- Text on any page, articles and special offers
- The logo or the design

When you ask for a change, please send:

- the page it is on

- what it says now
- what it should say, along with any new photos

For a new doctor, please send: a portrait photo, their qualifications, the languages they speak, and a short biography.

5. If Something Goes Wrong

Most issues have a simple cause. Try the check below first. If that doesn't solve it, contact us (see section 6).

What you notice	What to try first
A team member can't sign in	On the Staff page, click **Reset password** next to their name
The invitation link says it has expired	On the Staff page, click **Resend invite**
Someone sees "No admin access"	They haven't been invited yet. Invite them from the Staff page
A patient didn't receive a confirmation email	Ask them to check their spam folder. Their booking is still saved in the admin panel
No WhatsApp alert for a new booking	The booking is still in the admin panel. Let us know so we can check the alerts
A new Instagram post isn't on the website	Wait 15 minutes and refresh the page. Check the caption words in section 4
The website won't open	Check whether the website address (domain) is due for renewal, then contact us straight away

When you contact us, please tell us

- which page or screen it happened on
- what you expected, and what happened instead
- the time it happened
- a screenshot or photo of the screen, if possible

Things we look after for you

- Keeping the website online, secure and up to date
- Backups of your information
- The links to payments, email, WhatsApp, Instagram and Google
- Moving card payments from test mode to real payments when you are ready

6. Our Ongoing Support

After handover, Kelpsi Software LLC will continue to look after your website. Items in [brackets] will be confirmed in our service agreement.

What we will continue to do

Keep your website running - Check that the website, bookings, payments and admin panel are working. - Keep the website secure with regular updates. - Make sure your information is backed up. - Remind you before the website address or other services need renewing.

Look after the connections - Card payments (Stripe) - Emails to patients and the clinic - WhatsApp alerts - Instagram posts and videos - Google reviews

Help when you need it

How urgent	For example	We respond
Urgent	The website is down, or bookings or payments aren't working	[Within 4 working hours]
Important	Emails or WhatsApp alerts aren't arriving	[Within 1 working day]
Routine	A small display problem or question	[Within 3 working days]

- **Support hours:** [ ]
- **Contact:** [support email] or [WhatsApp number]

Make content changes - Updates to text, doctors, prices, opening hours and offers. See section 4. - Up to [ ] hours each month are included.

Monthly summary - A short report each month: bookings and orders, anything we fixed, and our suggestions.

Optional extras (quoted separately)

- Uploading product and treatment photos straight from the admin panel
- An Arabic version of the website
- Appointment reminders to patients by WhatsApp or email
- Connecting online bookings to your appointment system (InstaHMS)
- Writing articles and helping the website appear higher on Google
- Reception-only logins with limited access

Terms

Start date	[ ]
Length	[12 months, renewing unless either side gives 30 days' notice]
Monthly fee	[AED]
Running costs of the services in section 2	Paid by the clinic

Your website always belongs to you

The website and every account belong to the clinic. If you ever choose another provider, we will hand over everything we hold, remove our access, and help with the move for [30 days].

7. Handover Checklist and Sign-off

We will go through this list together at the handover meeting.

Accounts in the clinic's name

- ☐ All accounts in section 2 are in the clinic's name, with Kelpsi added as a helper
- ☐ Passwords handed over safely, in person or through a password manager

Kelpsi confirms the website is fully set up

- ☐ The website is live at the clinic's address
- ☐ Booking emails and WhatsApp alerts are switched on
- ☐ Card payments are switched on (live, not test mode)
- ☐ Instagram posts, videos and Google reviews are showing
- ☐ The latest copy of the website is safely stored

Tested together

- ☐ A test booking: the patient email, clinic email and WhatsApp alert all arrived
- ☐ A test purchase, then a refund: both show correctly in the admin panel
- ☐ The contact form works
- ☐ Videos play, and location links open Google Maps
- ☐ Dr. Hamid can sign in and sees the Staff page
- ☐ A team member is invited, sets a password and signs in
- ☐ Removing a team member ends their access

Training

- ☐ Admin panel walkthrough for the team
- ☐ Dr. Hamid shown how to invite, reset and remove team members
- ☐ Instagram caption words explained to whoever posts for the clinic
- ☐ Team members invited:

Still to come from the clinic

- ☐ HydraFacial before and after photos (with patient consent)
- ☐ Insights articles and Special Offers
- ☐ Confirmed clinic email address

Sign-off

By signing, both parties confirm that the items above are complete, or are listed below as still to do. Our ongoing support then begins as described in section 6.

Still to do (what, who, by when):

1. _____
2. _____
3. _____
