3. Admin Panel Guide

For reception and clinic staff. No technical knowledge needed.

Your first sign-in (invited staff)

1. The super admin invites you, and you receive an email: **"Your invitation to the clinic admin panel"**.
2. Click **Accept invitation**. The link works once and expires after 24 hours.
3. Enter your name, choose a password (at least 8 characters), and click **Save password & continue**.
4. You're now in the admin panel. From then on, sign in with your email and that password.

If the link has expired, ask the super admin to click **Resend invite**.

Logging in

1. Go to `<website>/admin`, or click **Staff Login** at the bottom of any page.
2. Enter your email and password.
3. To log out, click **Sign Out** in the side menu. Always sign out on shared computers.

Forgot your password? Ask the super admin to click **Reset password** next to your name on the Staff page. You'll get an email with a link to choose a new one.

Dashboard

The first screen shows:

- **Pending bookings:** requests nobody has dealt with yet.
- **Unpaid orders:** shop orders not yet paid.
- **Confirmed revenue:** total from paid orders.
- **Low stock items:** products running out.
- **Recent activity.**

New bookings and orders appear **instantly**. There's no need to refresh the page.

Bookings

Every consultation request from the website appears here.

Status	Meaning	What to do
Pending	New request	Call or WhatsApp the patient to confirm the time
Confirmed	Time agreed with the patient	Make sure it is in the clinic's appointment system

Status	Meaning	What to do
Completed	The patient attended	Nothing
Cancelled	Will not go ahead	Nothing

- The **WhatsApp** button opens a chat with the patient, with a message already filled in.
- Change the status as the booking moves along. This keeps the dashboard accurate.
- **Delete** only removes test or duplicate entries. Deleting cannot be undone.

> A booking from the website is a **request**. The patient was told the clinic will confirm. Contact them as soon as possible, ideally within the same working day.

Orders and payments

Each order has **two separate statuses**:

Payment status is set automatically by Stripe. Don't change it by hand.

Status	Meaning
Pending	Not paid yet. This includes orders placed by WhatsApp, which are paid on delivery or by arrangement.
Paid	Card payment received
Failed	The payment did not go through
Expired	The customer left checkout without paying
Refunded	Money returned through Stripe

Fulfilment status is updated by staff: **Pending** → **Processing** → **Shipped** → **Completed**, or **Cancelled**.

- **Refunds** are made in the **Stripe dashboard**, not in the admin panel. The order switches to *Refunded* automatically.
- For WhatsApp orders, contact the customer to arrange payment and delivery.

Inventory (shop products)

- **Add a product:** click **Add Product**, then fill in the name, category, skin concern, size, price (AED), stock and description, and paste an **image link**.
- **Edit:** click the pencil icon.
- **Hide a product** without deleting it: switch **Active** off.
- **Stock** goes down automatically when an order is paid. Update it when new stock arrives.
- **Badge** shows a small label on the product, for example "Bestseller" or "New". It is optional.

Treatments

What you change here updates the Home page, the Treatments page and the Treatment Menu at once.

- Each treatment has a name, category, description, price text, duration, icon, image link, and **Featured** and **Active** switches.
- **Featured** shows the treatment prominently on the Home page.
- Switch **Active** off to hide a treatment without losing it.

Staff (super admin only)

Only the super admin sees **Staff** in the menu.

- **Invite someone:** enter their name and email, then click **Send invite**. They receive an email with a link to set their password, and appear in the list as **Invited**. Once they've set a password they show as **Active**.
- **Resend invite / Reset password:** sends the person a fresh link, for an expired invitation or a forgotten password.
- **Remove:** ends that person's access immediately. Do this the day someone leaves the clinic.
- If the email can't be sent, the page shows the link instead. Copy it and send it to the person yourself, for example by WhatsApp.
- Every staff member has full access to bookings, orders, products and treatments, so only invite people who need it.

Good practice

- Check the dashboard at the start and end of each day.
- Never share logins. Each staff member should have their own account, invited from the Staff page.
- If something looks wrong, such as a missing booking or an order with the wrong status, note the patient's name and the time, then contact support. See file 7.
